

Circular - University of Montana, Agricultural Experiment Station Volume 1-42 (Paperback)

By Montana Agricultural Station

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 Excerpt: .of its center than is the horizontal wheel. If a horizontal wheel of the cup type with the wheel revolving to the left is placed in the current near the right bank looking up stream, the velocity will be greater.in the concave sides of the cups and the wheel will turn faster ihan it did under the same average velocity when rated; therefore: he rating sheet will give too high a velocity. On the other side of the stream the conditions will be reversed and the water may flow o much faster on the convex sides of the cups than on the concave that the wheel may turn backward, or not at all, or at a slower rate than it should for the average velocity. Before a current meter can be used intelligently, the operator must understand how to determine the average velocity of a cross...
