

25 Big Ideas in Science

By Robert Matthews

Oneworld Publications. Paperback. Book Condition: new. BRAND NEW, 25 Big Ideas in Science, Robert Matthews, From the Big Bang to the Theory of Everything, Sunday Telegraph Science Correspondent Robert Matthews takes us on a tour of twenty-five of the biggest ideas in modern science. Along the way, he explains how the theory that proved Einstein wrong might one day make teleportation possible; how the principles of mathematics could be used to broker peace treaties; and why the key to understanding some of the deepest mysteries of the universe could be linked to the barcode on our groceries. Matthews uncovers the major personalities in the history of science, from World War Two code breaker Alan Turing and his test for artificial intelligence, to modern scientists such as Richard Dawkins and Stephen Hawking. He explains key terms throughout and each 'big idea' also features a timeline charting the key discoveries.

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be playful, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.

-- **Rene Olson**
