

## PROPERTIES OF BAMBOO Influence of Volume Fraction and Fibre Length

By Gbasouzor Austin Ikechukwu

LAP Lambert Academic Publishing Mai 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - Natural bamboo fibre-reinforced composite are biogradable, lightweight and non-corrosive. They have good temperature resistant and low environment pollution. These advantages placed the natural fibre composite among the high performance composites. The compounding and the volume fraction of these materials will determine the performance and hence the acceptability to these composites as an engineering materials. This book covers the extraction of fibre strand from bamboo tree, fibre treatment, arrangement of fibre chopped strand into random mat and formation of laminate. The effects of fibre length and volume fraction on the mechanical properties were investigated. The possible modifications to improve the fibre wettability and decrease moisture absorption were considered. The analysis presented in this book should be useful to professionals in manufacturing and building industries. Material engineering students and anymore interested in material science will treasure this book. 76 pp. Englisch.

### Reviews

*An exceptional publication as well as the font applied was intriguing to learn. It usually does not charge an excessive amount of. Its been designed in an exceedingly basic way and it is just after i finished reading through this book through which in fact altered me, modify the way in my opinion.*

-- **Haylee Hackett**

*It in a of the best ebook. It generally is not going to expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Ara Williamson**
