By Federated Institutes of Brewing

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 edition. Excerpt: .higher the apparent diastatic power. In order that the test may be carried out at a constant temperature in winter and summer, and since it is easier to heat water than to cool it, these chemists suggest that the 10 test-tubes containing the starch conversions should be placed in a water bath for an hour at a constant temperature of 70 F. (21 C). After the 10 test-tubes containing the malt extract and soluble starch have remained for exactly an hour 5 c.c. of Fehling s solution are added to each, the tubes again shaken, and the whole series placed in a boiling-water bath for 10 minutes. On examination, some of the tubes will be found to be over-reduced, as shown by their yellow colour, and others under-reduced, as shown by their blue colour. The two consecutive tubes--one of which is slightly over-reduced and...

### Reviews

*Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Otis Wisoky**

*This publication is great. It is full of wisdom and knowledge You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).*

-- **Dr. Everett Dicki DDS**
